

Lisa Kastanek

Hello, my name is Lisa Kastanek. I am a registered nurse and the Managing Partner of Physician Research Collaboration, LLC (PRC). I work with sponsors and physicians to provide the best clinical trial opportunities for those wanting to volunteer to participate.

I have been a registered nurse for 36 years with the last 33 years spent in clinical research. I have been blessed to work with highly accomplished physicians, an amazing research team and volunteers that are second to none. I am so grateful that our research team has had the opportunity to work on some of the most exciting therapeutic advances and have been witness to dramatic, life changing moments.

Outside of my research interests I really enjoy outdoor activities: biking, hiking, kayaking, paddle boarding and boating. I also enjoy traveling and reading. My husband and I have four children, two son-in-law's and three grandchildren that we spend our outdoor time with and as much time together as we possibly can.

A fun fact: I drive without the radio on.
