

Paula Graham

Greetings, my name is Paula Graham. I am a Registered Health Information Technologist (RHIT). I work here at Physician Research Collaboration, LLC (PRC) as our Data Entry Specialist. My job's main emphasis is on electronic data management, query resolution, and quality assurance of our source data documentation. I thoroughly enjoy working in research due to the attention to detail this job brings, the various miscellaneous projects that I work on which allow me to use my creativity, along with the flexible hours to be able to meet my family's needs at home.

I previously worked at North Memorial Medical Center in MPLS, MN for roughly 7.5 years as a Concurrent Reviewer with focus on coding, quality assurance, and risk management. In 1995, I was blessed to be a stay-at-home mom for about 6 years. I then worked part-time for 5 additional years for the public school system before coming to work full time for PRC in January of 2006. I am very blessed to be a part of this wonderful research team called PRC.

My interests and hobbies outside of work include: church activities, spending time with my grandchildren, gardening/yardwork, quilting, listening to Christian music, watching Husker football games, and any outdoor activities. My husband and I are currently blessed with 2 children, 1 daughter-in-law, and 3 grandchildren.

A fun fact: My son is a quadriplegic and plays wheelchair tennis. In 2018, he ranked #5 in his division in the USA and #33 in the world!
